Flowering Plants. Eudicots: Santalales, Balanophorales (The Families and Genera of Vascular Plants)

Job Kuijt, Bertel Hansen

In the present volume taxonomic treatments including descriptions of and keys to the families and genera for the orders Santalales and Balanophorales are offered, the former group here comprising 12 families with 162 genera and about 2100 species, and the latter with the single family Balanophoraceae composed of 16 genera and about 42 species. The contentious family classification of Santalales has been thoroughly revised against the background of previous classifications as well as available structural and molecular evidence, and also the classification of Balanophoraceae has been carefully updated.

Santalales are predominantly hemiparasites connected with either the branches or the roots of other green land plants, whereas Balanophoraceae are holoparasites that form terrestrial tubers attached to the roots of woody hosts. In both orders, parasitism has led to considerable reductions of the vegetative and reproductive organs and detailed descriptions are given on the initiation of ramal and terrestrial parasitism in Santalales and the haustorial connection and tissue continuity between host and parasite in both groups. The dramatic reduction of the vegetative body in Balanophoraceae, which may lack all vegetative organs typically found in green land plants, has promoted studies in the field of developmental morphology. Thus, the volume not only provides an overview of the diversity of the plant groups treated therein, but also points to the interesting biological peculiarities that have evolved in connection with their singular lifestyle.

From reader reviews:

Michael Pauls:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite e-book and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Flowering Plants. Eudicots: Santalales, Balanophorales (The Families and Genera of Vascular Plants). Try to face the book Flowering Plants. Eudicots: Santalales, Balanophorales (The Families and Genera of Vascular Plants) as your buddy. It means that it can to get your friend when you truly feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortunate for you personally. The book makes you considerably more confidence because you can know every thing by the book. So , we should make new experience along with knowledge with this book.

Heather Bencomo:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a go walking, shopping, or went to typically the Mall. How about open or read a book called Flowering Plants. Eudicots: Santalales, Balanophorales (The Families and Genera of Vascular Plants)? Maybe it is for being best activity for you. You recognize beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with the opinion or you have various other opinion?

Christine Andrews:

Reading a publication tends to be new life style in this particular era globalization. With examining you can get a lot of information that will give you benefit in your life. Together with book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. A lot of author can inspire their own reader with their story or maybe their experience. Not only situation that share in the textbooks. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors in this world always try to improve their expertise in writing, they also doing some investigation before they write for their book. One of them is this Flowering Plants. Eudicots: Santalales, Balanophorales (The Families and Genera of Vascular Plants).

Mattie Priest:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are having problem with the book in comparison with can satisfy your short space of time to read it because all of this time you only find guide that need more time to be examine. Flowering Plants. Eudicots: Santalales, Balanophorales (The Families and Genera of Vascular Plants) can be your answer mainly because it can be read by an individual who have those short time problems.
