Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series)

Benson Farb, Richard Hain, Eduard Looijenga

Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series) Benson Farb, Richard Hain, Eduard Looijenga

Mapping class groups and moduli spaces of Riemann surfaces were the topics of the Graduate Summer School at the 2011 IAS/Park City Mathematics Institute. This book presents the nine different lecture series comprising the summer school, covering a selection of topics of current interest. The introductory courses treat mapping class groups and Teichmüller theory. The more advanced courses cover intersection theory on moduli spaces, the dynamics of polygonal billiards and moduli spaces, the stable cohomology of mapping class groups, the structure of Torelli groups, and arithmetic mapping class groups. The courses consist of a set of intensive short lectures offered by leaders in the field, designed to introduce students to exciting, current research in mathematics. These lectures do not duplicate standard courses available elsewhere. The book should be a valuable resource for graduate students and researchers interested in the topology, geometry and dynamics of moduli spaces of Riemann surfaces and related topics.

From reader reviews:

Lonnie Bowers:

Now a day people who Living in the era exactly where everything reachable by match the internet and the resources included can be true or not demand people to be aware of each details they get. How a lot more to be smart in getting any information nowadays? Of course the reply is reading a book. Reading a book can help men and women out of this uncertainty Information specially this Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series) book since this book offers you rich details and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it as you know.

Ray Ortiz:

Nowadays reading books be a little more than want or need but also become a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book that will improve your knowledge and information. The information you get based on what kind of book you read, if you want get more knowledge just go with training books but if you want really feel happy read one using theme for entertaining including comic or novel. The particular Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series) is kind of guide which is giving the reader unpredictable experience.

Clifford Harvey:

Your reading sixth sense will not betray anyone, why because this Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series) publication written by well-known writer whose to say well how to make book that could be understand by anyone who read the book. Written within good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still skepticism Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series) as good book not just by the cover but also by content. This is one guide that can break don't determine book by its deal with, so do you still needing another sixth sense to pick this specific!? Oh come on your studying sixth sense already said so why you have to listening to another sixth sense.

Roderick Grubb:

Is it you who having spare time then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Moduli Spaces of Riemann Surfaces (IAS/Park City Mathematics Series) can be the solution, oh how comes? The new book you know. You are so out of date, spending your free time by reading in this completely new era is common not a geek activity. So what these guides have than the others?
