**The Earth as a Distant Planet: A Rosetta Stone for the Search of Earth-Like Worlds (Astronomy and Astrophysics Library)** M. Vázquez, E. Pallé, P. Montañés Rodríguez

In *The Earth as a Distant Planet*, the authors become external observers of our solar system from a distance and try to determine how one can understand how Earth, the third in distance to the central star, is essentially unique and capable of sustaining life. The knowledge gained from this original perspective is then applied to the search for other planets outside the solar system, or exoplanets.

Since the discovery in 1992 of the first exoplanet, the number of planet detections has increased exponentially and ambitious missions are already being planned for the future. The exploration of Earth and the rest of the rocky planets are Rosetta stones in classifying and understanding the multiplicity of planetary systems that exist in our galaxy. In time, statistics on the formation and evolution of exoplanets will be available and will provide vital information for solving some of the unanswered questions about the formation, as well as evolution of our own world and solar system. Special attention is paid to the biosignatures (signs of life) detectable in the Earth's reflected spectra and the search for life in the universe.

The authors are experts on the subject of extrasolar planets. They provide an introductory but also very much up-to-date text, making this book suitable for researchers and for advanced students in astronomy and astrophysics.

**From reader reviews:**

**David Guyton:**

Book will be written, printed, or created for everything. You can understand everything you want by a book. Book has a different type. We all know that that book is important issue to bring us around the world. Close to that you can your reading ability was fluently. A publication The Earth as a Distant Planet: A Rosetta Stone for the Search of Earth-Like Worlds (Astronomy and Astrophysics Library) will make you to always be smarter. You can feel more confidence if you can know about everything. But some of you think which open or reading the book make you bored. It is not make you fun. Why they can be thought like that? Have you seeking best book or appropriate book with you?

**Edna McArdle:**

The particular book The Earth as a Distant Planet: A Rosetta Stone for the Search of Earth-Like Worlds (Astronomy and Astrophysics Library) has a lot associated with on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. Mcdougal makes some research ahead of write this book. This book very easy to read you may get the point easily after scanning this book.

**Sandra Williams:**

Why? Because this The Earth as a Distant Planet: A Rosetta Stone for the Search of Earth-Like Worlds (Astronomy and Astrophysics Library) is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will surprise you with the secret the item inside. Reading this book next to it was fantastic author who all write the book in such wonderful way makes the content interior easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of positive aspects than the other book include such as help improving your talent and your critical thinking means. So , still want to delay having that book? If I had been you I will go to the book store hurriedly.

**Donald Thomas:**

Don't be worry if you are afraid that this book will probably filled the space in your house, you can have it in e-book technique, more simple and reachable. This specific The Earth as a Distant Planet: A Rosetta Stone for the Search of Earth-Like Worlds (Astronomy and Astrophysics Library) can give you a lot of buddies because by you considering this one book you have issue that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't recognize, by knowing more than additional make you to be great people. So , why hesitate? Let me have The Earth as a Distant Planet: A Rosetta Stone for the Search of Earth-Like Worlds (Astronomy and Astrophysics Library).
