Todd's Cardiovascular Reviews are the leading study guides for cath lab professionals. Organized around the most current exam content/matrix for the national CV exams, Todd's Review books include hundreds of sample questions designed to be similar to the exams you will take, with the specific content of each national exam outlined and explained, along with exam tips and study aids. You need Volume 3: Hemodynamic Calculations if you are:

- Preparing for either your CCI registry exams (RCIS) or ARRT exams (CI and VI)
- Working as an invasive or interventional lab specialist
- Seeking professional cardiovascular training and development hours

Cardiovascular Review Vol. 3: Hemodynamic Calculations includes over 500 questions, answers, explanations, and references designed to help invasive professionals such as nurses, technicians, cath lab or interventional lab specialists as they study and prepare for exams. Vol. 3: Hemodynamic Calculations focuses on cath lab hemodynamics, calculation methods, and measurement examples, including chapters on:

- Cardiac pressure identification
- Reading pressures
- Pressure recording systems
- Pressure pathology
- Valve area calculation
- Cardiac outputs and shunts
- Quantitative LV angiography
- Coronary hemodynamics and IVUs
- Other measurements made in the cath lab

Maximize your knowledge. Customize a comprehensive learning plan by matching topics in Todd's Cardiovascular Review Volumes 1, 2, 3, 4, and 5 with the content for your profession and exams. We have included information that we believe will be on the national CV Invasive Registry examinations. However, it is up to you to match appropriate material from these volumes with the content of your exams. Effective, efficient learning. Todd's Cardiovascular Reviews are written in easy-to-understand language, with graphics included on virtually every page for visual learning.
