This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: ...the cone obliquely. To find points on the curve in plan take a series of horizontal planes xyz, etc., between points c and d. One of these planes, as w, should be taken through the center of cd. The points c and d must be points on the curve, since the plane cuts the two contour elements at these points. Contour elements are those forming the outline. The horizontal projections of the contour elements will be found in a horizontal line passing through the center of the base; hence the horizontal projection of c and d will be found on this center line, and will be the extreme ends of the curve. The plane x cuts the surface of the cone in a circle, as it is parallel to the base, and the diameter of the circle is the distance between the points where x crosses the two contour elements. This circle, lettered x on the plan, has its center at the horizontal projection of the apex. The circle x and the curve cut by the plane are both on the surface of the cone, and their vertical projections intersect at the points 2-2. Point 2 on the elevation then represents two points which are shown in plan directly above on the circle x, and are points on the required intersection. Planes y and z, and as many more as may be necessary to determine the curve accurately, are used in the same way. The curve found is an ellipse. The student will readily see that the true size of this ellipse is not shown in Fig. 139. Ellipse--Section from a Cone the plan, for the plane containing the curve is not parallel to the horizontal. In order to find the actual size of the ellipse, it is necessary to place Z' its plane in a position parallel either to the vertical or to the horizontal. The actual length of the long diameter of the ellipse must be shown in elevation, cvd", because the l...

From reader reviews:

Thomas Fleischmann:

What do you consider book? It is just for students as they are still students or the item for all people in the world, the particular best subject for that? Merely you can be answered for that issue above. Every person has various personality and hobby per other. Don't to be obligated someone or something that they don't need do that. You must know how great along with important the book Carpentry and contracting Volume 2; a practical reference work on carpentry, building superintendence, etc. All type of book are you able to see on many methods. You can look for the internet methods or other social media.

Clare Lucas:

Now a day people that Living in the era exactly where everything reachable by interact with the internet and the resources included can be true or not involve people to be aware of each facts they get. How many people to be smart in having any information nowadays? Of course the correct answer is reading a book. Studying a book can help individuals out of this uncertainty Information especially this Carpentry and contracting Volume 2; a practical reference work on carpentry, building superintendence, etc book as this book offers you rich details and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it you know.

Charles Barton:

Do you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Aim to pick one book that you never know the inside because don't judge book by its protect may doesn't work here is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer is usually Carpentry and contracting Volume 2; a practical reference work on carpentry, building superintendence, etc why because the amazing cover that make you consider regarding the content will not disappoint you actually. The inside or content is fantastic as the outside or perhaps cover. Your reading 6th sense will directly make suggestions to pick up this book.

Ruth Vazquez:

That e-book can make you to feel relax. This particular book Carpentry and contracting Volume 2; a practical reference work on carpentry, building superintendence, etc was bright colored and of course has pictures on there. As we know that book Carpentry and contracting Volume 2; a practical reference work on carpentry, building superintendence, etc has many kinds or genre. Start from kids until teens. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. Therefore not at all of book are usually make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.
