**Control of Power Inverters in Renewable Energy and Smart Grid Integration** Qing-Chang Zhong, Tomas Hornik

Integrating renewable energy and other distributed energy sources into smart grids, often via power inverters, is arguably the largest “new frontier” for smart grid advancements. Inverters should be controlled properly so that their integration does not jeopardize the stability and performance of power systems and a solid technical backbone is formed to facilitate other functions and services of smart grids.

This unique reference offers systematic treatment of important control problems in power inverters, and different general converter theories. Starting at a basic level, it presents conventional power conversion methodologies and then ‘non-conventional’ methods, with a highly accessible summary of the latest developments in power inverters as well as insight into the grid connection of renewable power.

Consisting of four parts – Power Quality Control, Neutral Line Provision, Power Flow Control, and Synchronisation – this book fully demonstrates the integration of control and power electronics.

Key features include:

- the fundamentals of power processing and hardware design
- innovative control strategies to systematically treat the control of power inverters
- extensive experimental results for most of the control strategies presented
- the pioneering work on “synchronverters” which has gained IET Highly Commended Innovation Award

Engineers working on inverter design and those at power system utilities can learn how advanced control strategies could improve system performance and work in practice. The book is a useful reference for researchers who are interested in the area of control engineering, power electronics, renewable energy and distributed generation, smart grids, flexible AC transmission systems, and power systems for more-electric aircraft and all-electric ships. This is also a handy text for graduate students and university professors in the areas of electrical power engineering, advanced control engineering, power electronics, renewable energy and smart grid integration.

### **From reader reviews:**

#### **Bert Gomes:**

Often the book Control of Power Inverters in Renewable Energy and Smart Grid Integration has a lot info on it. So when you read this book you can get a lot of profit. The book was authored by the very famous author. Tom makes some research just before write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

#### **Robert Thomas:**

The reason why? Because this Control of Power Inverters in Renewable Energy and Smart Grid Integration is an unordinary book that the inside of the publication waiting for you to snap that but latter it will surprise you with the secret that inside. Reading this book beside it was fantastic author who have write the book in such awesome way makes the content on the inside easier to understand, entertaining way but still convey the meaning totally. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book include such as help improving your skill and your critical thinking means. So , still want to delay having that book? If I were you I will go to the e-book store hurriedly.

#### **Jonathan Ouzts:**

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just small students that has reading's heart or real their pastime. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Control of Power Inverters in Renewable Energy and Smart Grid Integration can make you truly feel more interested to read.

#### **Kathryn Hill:**

A number of people said that they feel uninterested when they reading a reserve. They are directly felt the idea when they get a half regions of the book. You can choose typically the book Control of Power Inverters in Renewable Energy and Smart Grid Integration to make your own personal reading is interesting. Your skill of reading skill is developing when you similar to reading. Try to choose very simple book to make you enjoy you just read it and mingle the idea about book and studying especially. It is to be first opinion for you to like to open up a book and read it. Beside that the guide Control of Power Inverters in Renewable Energy and Smart Grid Integration can to be your friend when you're feel alone and confuse with the information must you're doing of these time.
