Introduction to Proteins: Structure, Function, and Motion (Chapman & Hall/CRC Mathematical and Computational Biology) Amit Kessel, Nir Ben-Tal

As the tools and techniques of structural biophysics assume greater roles in biological research and a range of application areas, learning how proteins behave becomes crucial to understanding their connection to the most basic and important aspects of life.

With more than 350 color images throughout, **Introduction to Proteins: Structure, Function, and Motion** presents a unified, in-depth treatment of the relationship between the structure, dynamics, and function of proteins. Taking a structural–biophysical approach, the authors discuss the molecular interactions and thermodynamic changes that transpire in these highly complex molecules.

The text incorporates various biochemical, physical, functional, and medical aspects. It covers different levels of protein structure, current methods for structure determination, energetics of protein structure, protein folding and folded state dynamics, and the functions of intrinsically unstructured proteins. The authors also clarify the structure–function relationship of proteins by presenting the principles of protein action in the form of guidelines.

This comprehensive, color book uses numerous proteins as examples to illustrate the topics and principles and to show how proteins can be analyzed in multiple ways. It refers to many everyday applications of proteins and enzymes in medical disorders, drugs, toxins, chemical warfare, and animal behavior. Downloadable questions for each chapter are available at CRC Press Online.

From reader reviews:

Robert Mundo:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each book has different aim or even goal; it means that book has different type. Some people truly feel enjoy to spend their time to read a book. They can be reading whatever they take because their hobby is usually reading a book. Consider the person who don't like looking at a book? Sometime, person feel need book when they found difficult problem or perhaps exercise. Well, probably you will want this Introduction to Proteins: Structure, Function, and Motion (Chapman & Hall/CRC Mathematical and Computational Biology).

Joyce Loza:

Have you spare time for just a day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to the actual Mall. How about open or even read a book titled Introduction to Proteins: Structure, Function, and Motion (Chapman & Hall/CRC Mathematical and Computational Biology)? Maybe it is to get best activity for you. You know beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have different opinion?

Marlon Taylor:

The book with title Introduction to Proteins: Structure, Function, and Motion (Chapman & Hall/CRC Mathematical and Computational Biology) contains a lot of information that you can discover it. You can get a lot of help after read this book. This kind of book exist new know-how the information that exist in this guide represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This specific book will bring you throughout new era of the glowbal growth. You can read the e-book in your smart phone, so you can read it anywhere you want.

Sarah Porter:

That guide can make you to feel relax. This book Introduction to Proteins: Structure, Function, and Motion (Chapman & Hall/CRC Mathematical and Computational Biology) was bright colored and of course has pictures on there. As we know that book Introduction to Proteins: Structure, Function, and Motion (Chapman & Hall/CRC Mathematical and Computational Biology) has many kinds or type. Start from kids until young adults. For example Naruto or Investigator Conan you can read and believe you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that.
