Biophysics: Searching for Principles

William Bialek

Biophysics: Searching for Principles William Bialek

Interactions between the fields of physics and biology reach back over a century, and some of the most significant developments in biology--from the discovery of DNA's structure to imaging of the human brain--have involved collaboration across this disciplinary boundary. For a new generation of physicists, the phenomena of life pose exciting challenges to physics itself, and biophysics has emerged as an important subfield of this discipline. Here, William Bialek provides the first graduate-level introduction to biophysics aimed at physics students.

Bialek begins by exploring how photon counting in vision offers important lessons about the opportunities for quantitative, physics-style experiments on diverse biological phenomena. He draws from these lessons three general physical principles--the importance of noise, the need to understand the extraordinary performance of living systems without appealing to finely tuned parameters, and the critical role of the representation and flow of information in the business of life. Bialek then applies these principles to a broad range of phenomena, including the control of gene expression, perception and memory, protein folding, the mechanics of the inner ear, the dynamics of biochemical reactions, and pattern formation in developing embryos.

Featuring numerous problems and exercises throughout, *Biophysics* emphasizes the unifying power of abstract physical principles to motivate new and novel experiments on biological systems.

- Covers a range of biological phenomena from the physicist's perspective
- Features 200 problems
- Draws on statistical mechanics, quantum mechanics, and related mathematical concepts
- Includes an annotated bibliography and detailed appendixes
- Instructor's manual (available only to teachers)

From reader reviews:

Betty Sanchez:

In this 21st hundred years, people become competitive in each and every way. By being competitive currently, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that at times many people have underestimated the item for a while is reading. Yes, by reading a book your ability to survive raise then having chance to endure than other is high. For you who want to start reading some sort of book, we give you this kind of Biophysics: Searching for Principles book as basic and daily reading e-book. Why, because this book is greater than just a book.

Stella Carpenter:

Reading a e-book can be one of a lot of action that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new data. When you read a reserve you will get new information mainly because book is one of a number of ways to share the information or their idea. Second, reading through a book will make a person more imaginative. When you studying a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, you are able to share your knowledge to some others. When you read this Biophysics: Searching for Principles, it is possible to tells your family, friends and also soon about yours reserve. Your knowledge can inspire different ones, make them reading a book.

Bennie Gale:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book has been rare? Why so many issue for the book? But just about any people feel that they enjoy regarding reading. Some people likes reading, not only science book but in addition novel and Biophysics: Searching for Principles or others sources were given expertise for you. After you know how the good a book, you feel want to read more and more. Science e-book was created for teacher or perhaps students especially. Those guides are helping them to add their knowledge. In some other case, beside science book, any other book likes Biophysics: Searching for Principles to make your spare time considerably more colorful. Many types of book like this one.

Susan Woods:

As a college student exactly feel bored to be able to reading. If their teacher requested them to go to the library or even make summary for some e-book, they are complained. Just small students that has reading's soul or real their leisure activity. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Biophysics: Searching for Principles can make you sense

more interested to read.
