## General Physics : Multiple - Choice Questions : Waves , Thermodynamics , Electricity and Magnetism

Ibraheem Nasser

This book is a collection of 954 multiple-choice questions in waves, thermodynamics, electricity, and magnetism. These questions have been given, over couple of years, to the students of General Physics II course (Phys102) at King Fahd University of Petroleum and Minerals. They are organized according to the sections of Phys102 textbook: Fundamental of Physics by Halliday, Resnick and Walker, 6th edition. This collection might be very helpful for students preparing for exams in Phys102 or similar courses. We advise students strongly to study and understand the course material very well before attempting practicing some of these questions. Instructors might also find this book a valuable source for questions that can be used in examples or tests. The statistics provided with some of the questions might be very valuable in comparing performances.
