## **Manufacturing Automation: Metal Cutting Mechanics, Machine Tool Vibrations, and CNC Design**

Yusuf Altintas

Metal cutting is a widely used method of producing manufactured products. The technology of metal cutting has advanced considerably along with new materials, computers, and sensors. This new edition treats the scientific principles of metal cutting and their practical application to manufacturing problems. It begins with metal cutting mechanics, principles of vibration, and experimental modal analysis applied to solving shop floor problems. Notable is the in-depth coverage of chatter vibrations, a problem experienced daily by manufacturing engineers. The essential topics of programming, design, and automation of CNC (computer numerical control) machine tools, NC (numerical control) programming, and CAD/CAM technology are discussed. The text also covers the selection of drive actuators, feedback sensors, modeling and control of feed drives, the design of real time trajectory generation and interpolation algorithms, and CNC-oriented error analysis in detail. Each chapter includes examples drawn from industry, design projects, and homework problems. This book is ideal for advanced undergraduate and graduate students, as well as practicing engineers.

### **From reader reviews:**

#### **Adam Nelson:**

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each e-book has different aim or maybe goal; it means that reserve has different type. Some people truly feel enjoy to spend their a chance to read a book. They may be reading whatever they have because their hobby is actually reading a book. Why not the person who don't like reading a book? Sometime, man or woman feel need book if they found difficult problem or even exercise. Well, probably you will need this Manufacturing Automation: Metal Cutting Mechanics, Machine Tool Vibrations, and CNC Design.

#### **Michelle Sanders:**

Reading a e-book can be one of a lot of action that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new information. When you read a guide you will get new information mainly because book is one of various ways to share the information or their idea. Second, looking at a book will make an individual more imaginative. When you reading through a book especially tale fantasy book the author will bring you to definitely imagine the story how the people do it anything. Third, you could share your knowledge to some others. When you read this Manufacturing Automation: Metal Cutting Mechanics, Machine Tool Vibrations, and CNC Design, you may tells your family, friends and soon about yours publication. Your knowledge can inspire the others, make them reading a guide.

#### **Louise Suttle:**

The publication with title Manufacturing Automation: Metal Cutting Mechanics, Machine Tool Vibrations, and CNC Design has a lot of information that you can study it. You can get a lot of profit after read this book. This particular book exist new information the information that exist in this guide represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. That book will bring you in new era of the globalization. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

#### **Cara Shaver:**

A number of people said that they feel uninterested when they reading a e-book. They are directly felt the idea when they get a half areas of the book. You can choose the book Manufacturing Automation: Metal Cutting Mechanics, Machine Tool Vibrations, and CNC Design to make your own reading is interesting. Your personal skill of reading proficiency is developing when you just like reading. Try to choose straightforward book to make you enjoy to study it and mingle the opinion about book and looking at especially. It is to be very first opinion for you to like to start a book and learn it. Beside that the book Manufacturing Automation: Metal Cutting Mechanics, Machine Tool Vibrations, and CNC Design can to be

your brand new friend when you're experience alone and confuse using what must you're doing of that time.
