Clinical Atlas of Peripheral Retinal Disorders Keith M. Zinn

This is a copiously illustrated atlas of the major retinal disorders, including trophic and tractional degeneration, inflammatory conditions, development anomalies, and pigmentary tumors. The three-dimensional ophthalmoscopic distillation of vitreous, retinal and choroidal pathology significantly enhances the text's abundant clinical material. For the first time, the Fundus Color Code is presented with full illustration. Ophthalmologists and residents in ophthalmology will find this book an indispensable tool in the recognition and diagnostic assessment of retinal disorders.
